

IS THE

FDA CORRUPT?

Even if 300 million doses of the vaccine are administered this year, that still is zero long-term data.

QUESTION #1: With a 99.814% survival rate*, is Covid19 really an emergency?

QUESTION #2: Didn't the experts at one time say that tobacco and cigarettes were safe?

QUESTION #3: If Vaccines take 10 to 12 years to approve, Does FDA Approval of Covid19 vaccines Only After a Year of Trials (i.e., no long-term data) mean
(A) An Emergency or (B) Follow-the-Money?

* Overall Covid19 Numbers

$$\begin{array}{l} \text{Covid19 Deaths } 610\text{K} \div \text{USA Pop. } 328\text{M} = 0.186\% \leftarrow \text{Covid19 Overall Death Rate} \\ \text{Total USA Population } 100\% - 0.186\% = 99.814\% \leftarrow \text{Survival Rate} \end{array}$$
