

# ICUs OVERFLOWING?

## **ICUs FILLED WITH NURSING HOME & CO-MORBID PATIENTS**

First, we know that 99% of Covid19 Deaths are with Nursing Home and Co-Morbid (e.g. Obesity, Cancer) patients. Thus, those in the ICUs are NOT CoronaVirus patients. They are Nursing Home, Cancer, Heart disease and Obesity patients, in the ICU, who have, by the way, have tested for the Corona Virus, and, in that order.

## **YEAR-ROUND OPERATING DESIGN GOAL**

Hospitals are designed be operated at 90 to 95% capacity year-round, otherwise, it would be a waste of money to build something that was never used.

## **EMPTY HOSPITAL BEDS DO NOT PAY THE BILLS**

Putting a borderline patient, who may, or may not, need a ventilator, is now put on a ventilator. A Covid19 Patient, who previously was sent home with medicine, is now recommended to stay in a hospital for observation.

## **THE SKY IS NOT FALLING SUMMARY**

While the Media, *again*, is Hying rising Covid19 4th Wave, 99% of the ICU's are Nursing Home and Co-Morbid patients, who by the way, have tested for the Covid. Lastly, More Media Hype also means More Money.
