

**8 MINUTES
46 SECONDS**

**ON THE NECK OF GEORGE FLOYD,
BUT NOT A SINGLE BRUISE OR
MARK COULD BE FOUND?**

Science would say that after 8 minutes of choking someone there should be lots of bruises. Thus, perhaps the Knee was just above the neck, but no pressure was applied or even physical contact made? *Note, there were bruises and marks on the face and shoulder, but not the neck. How can this be?*
