

DETER
CHEATERS

VS

CATCH
CHEATERS

BACKGROUND: Q: What happens when you shine the light in a dark room with rats? A: The rats scatter. - Hence, the Recall of Mayor Latoya *shined the light* on how inaccurate the voters' rolls were. Thus you knew there could be massive cheating. Same with MAGA groups checking voter rolls in other parts of Louisiana and finding massive voter roll inaccuracies.

SHINING LIGHT (DETERRENCE) => MANY DOMINOS FALL

So now the "cheaters" know that MAGA is "closely watching" and shining the light on the rats in Blue Democrat places like Orleans Parish. And what did the "cheaters" do? They scattered and didn't try to cheat. Second, Big Money Democrats also knew they could not easily pay for Cheaters to Cheat (without raising red flags) so you saw very little Advertising and "Get-Out-The-Vote" Money as the Big Money Democrats knew it would be wasted.

SUMMARY: A crushing defeat of La. Democrats on Oct 14, 2023, via aforementioned MAGA *Deterrence* of Cheating via Low Democrat Turnout (aka Cheaters), as opposed to "secure" voting systems to *catch* cheating. *NOTE: Stop-&-Frisk and Drug Testing Welfare Recipients are also Deterrant Tactics as opposed to Catch Tactics.*
