

COMPUTER VOTING SYSTEMS PAPER BALLOTS

#1 - A fraudulent vote cast can also have paper ballots printed out that can be stored and/or discarded just like legal votes.

#2 - Paper Ballots do ***not*** stop Fraud from being committed. Paper Ballots only assists in catching fraud, not physically stopping fraud.

#3 - Auditing your own paper ballot is a lot easier than auditing all the paper ballots printed out.

CASE IN POINT:

There are many high-tech security features in U.S. Currency, but that doesn't prevent counterfeiters from creating and passing fake bills. The same can be said for paper ballots and voting systems.
