# COMBAT VOTER FRAUD
# SLOW WALK VOTING
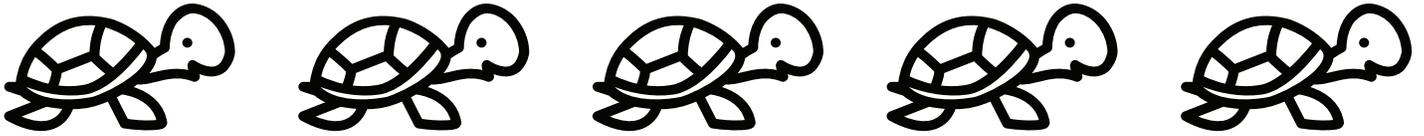

Because Blue Democrat Cities take much longer than Red Suburbs to report (from hours, days, to even weeks), it invites cheaters to fraudulently inflate their vote totals to match and exceed the current count of their opponent. All this, while going undetected under the  guise of a  media reported, ***very close race that was barely won at the end of the night.***

Hence, to counteract "cheating",  Slow-Walk Voting, that is, if a Significant Number of Voters could go to the polls right before close, and then "VOTE <u>SLOWLY</u>" to delay the Precinct Reporting.

Thus, this "Slow-Walk Voting" can function like a Sealed Bid for an Auction where all the bids are opened at the same time. Or, like all card players showing all their cards at the same time. That is, Straight Poker versus Texas Hold'Em Poker.  This method would not allow cheaters to know how many illegal votes are needed to win.
