

HOMO CURE?

MEDICAL EDUCATION VIDEOS = HOMO-ATTRACTION CURE?

1- Gay people could be educated about their medically dangerous lifestyle and that could result in a cure like what PETA does on trying with Gross-Out Videos to make people Vegetarians. For example, Gay Males on Microtears and Lesbians on Licking the Toilet.

2- With Gays, they should ask a doctor with one of those fiber-optic cameras and see it (tears in the rectum) for themselves and make a video copy and re-play the video at home as a "Homo Educational Cure" when they have an attraction to the same sex. NOTE: Microtears cause fecal material to enter the bloodstream and cause that person's lymph nodes to go into overdrives producing white blood cells to fight their own human waste system. This is the reason why many healthy Gays get weird auto-immune diseases (and cancers) and suddenly die while not contracting any STDs or AIDS.

3 - With Lesbians, for example, a Microscope Video on the Virus and Germs that cause Weird Cancers and Diseases associated with Lesbians Licking-the-Toilet can be recorded and shown when a lesbian is attracted to another female.

4 - These videos could also be stored on a Mobile Phone for immediate playback when an attraction event occurs to *"educate and visually train their brain"* and hopefully result in a HOMO Cure for that individual.

If The Truth Cuts Like a Knife, can it not Cut Out Same-Sex Attraction?
