

# **TULSA RIOT 1921 = 100% FAKE? RIOT!**

Did this riot ever happen as there are zero corroborating news articles on Tulsa, Oklahoma, around the same time?

#1 - The only thing is a Photoshopped front page of fire, smoke, and rubble. #2 - There is zero mention in historical papers, and there are not even the internal pages of that same front page that are referenced. #3 - The newspaper front page, as well as numerous photos of burned out buildings, have zero references to their raw data.

NOTE 1: Notice how Tulsa Riot stories are from the same newspaper article produced and modified dozens of times and also very similar legal documents dozens of times.

NOTE 2: It is interesting how some are able to file legal challenges but couldn't restart a single business! They even say they found mass graves and have a detailed explanation on how the riot started. Yet, still, there is no mention of anything about any of the businesses! That is, there is nothing about the Tulsa Black Wall Street businesses, e.g., owners, employees, vendors, customers, advertisements, services, products, or even the names of these businesses.

**BLACK WALL STREET = WAKANDA?**
