BLACK-ON-BLACK CRIME

The Real Story On Whipped Peter and His Infamous Photo
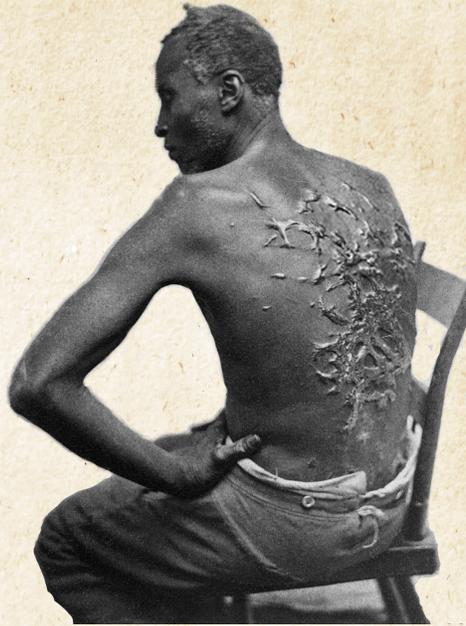

The truth about Whipped Peter (Gordan) is that he tried to kill his wife. The Plantation Overseer, usually a black man, as most Plantation Overseers were Black men, whipped Peter Gordon severely. When the Master found out, he fired the overseer. Later, Whipped Peter escaped to the Union North, and the Army saw the Scars on Whipped Peter as a great propaganda tool against Slavery, hence the infamous photo. But in reality, it was punishment due to a Black Man trying to kill his Black Wife, i.e., Black-on-Black Crime.

NOTE: It's probably the same for the many lynching photos taken during the Civil War era. That is, there is a story behind those photos, and it was probably a terrible crime that was committed. But Hollywood and the Left would not want you to know that because the movie would be boring, predictable, and bad for ticket sales and TV ratings.
